

How to Restrict an AI Agent to 'Draft-Only' (Without Revoking Access)

SecuriX End-User Portal at dash.securix.app

Sample Demo Agent using Securix's MCP

Connect your Google account to enable your personal AI agent. This integration allows the agent to assist you with **Google actions** across your workspace.

Send and manage your Gmail correspondence

Summarize complex email threads and Drive files

Search, retrieve, and organize folders in Google Drive

Connect Gmail

By connecting, you agree to allow the agent to access your Google Workspace data.

SecuriX AI

SecuriX AI provides the best in class security.

WHAT WE DO

- Read your profile information
- Access your files and documents
- Sync data across devices

UNDERSTANDING RISK LEVELS

- **Low**
Read-only access to non-sensitive data
- **Medium**
Read and write access to data
- **High**
Admin or workspace-level access

Secure & Transparent

We use OAuth 2.0 for secure authentication. You control which permissions each service receives.

You're In Control

Review every permission before authorizing. Disconnect anytime from your settings.

SecuriX Auth Portal

Select a profile

The Problem: "All-or-Nothing" Access

Zero Visibility: Permissions are buried deep in complex account settings.

Binary Control: Standard OAuth only offers "Full Access" or "Revoke All."

The SecuriX Solution: Granular, boundary-driven OAuth control.

The SecuriX Edge: We empower developers to set safe boundaries while giving their users an intuitive interface to manage granular OAuth scopes.
